

SOD & GOLF

# THE SPRING WAKE UP PLAN!

featuring:

## Nature's Wonder **APEX-10**<sup>™</sup>

*Bring healthier, stronger sod to market up to 6 months sooner*

**2 Gal**  
**per acre**  
each growing cycle

**Cool Season Turf:** Apply 1 gallon per acre at planting, 0.5 gallon per acre in early spring when soil temperatures are acceptable, and 0.5 gallon again 30 days later.

**Warm Season Turf:** Apply 1 gallon per acre when new growth has emerged or sprigs have shown consistent growth, 0.5 gallon 30 days later, and 0.5 gallon 30 days after that.

**Sod at Installation:** Spray 3oz per 1,000 sq. ft. on soil, then 3oz on top of sod.

*Wake up your greens, tees, & fairways*

### QUICK REPAIR GUIDE
